Forecast for Thursday 10 Jun 2021

Weather: Thursday will see a continuation of the grey and murky conditions with extensive cloud shrouding the hills, occasionally giving some drizzly rain. Northeastern parts of the National Park will see the cloud break at times through the afternoon to give some sunny spells.

Chance of cloud free mountain/hill tops above 600m: 20-30% in the southwest, 40% becoming 70% in the northeast.

Visibility: Often good at valley level, although deteriorating to just a few kilometres, during any periods of rain and drizzle. Generally very poor on modest hills and especially so over the higher mountains with blanket hill fog for most of the day. Widespread cloud with bases around 200-400m (highest in the east). Breaks in the cloud to 600m or higher may occur during the afternoon, with a chance of some summits clearing in the northeast by late afternoon.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Blanket hill fog will make navigation difficult on any unfamiliar and featureless terrain, especially during the morning. The best chance of any bright/sunny spells will be in the north and east of the Brecon Beacons area.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:

Forecast for Friday 11 Jun 2021

Weather: Remaining similar overnight into the early hours of Friday with low cloud, hill fog and drizzle. Damp and murky during the morning with occasional rain and drizzle. Staying similar into the afternoon but clearer skies are likely to arrive from the northwest during the evening.

Maximum wind: Southwesterly 30 mph gusting 40 mph, easing to 20 mph gusting 30 mph.

Chance of cloud free mountain/hill tops above 600m: 20-30% becoming 70% through the evening.

Visibility: Very poor within the cloud and hill fog at first, and poor even at lower levels in the rain and drizzle. Becoming good or very good in most areas through the afternoon. Widespread cloud with bases around 200-400m during the morning and first part of the afternoon. Cloud breaking to become periods above 700-800m later.

Temperature: **Valleys:** Plus 13 Celsius rising to plus 19 Celsius
At 600m: Plus 11 Celsius
Freezing level: Above the summits
